About us.

Innovation, quality & reliability.

Established 37 years ago, we manufacture, market and distribute innovative packaging products for the food-service industry to cover a wide range of occasions, under our iconic brand Castaway®.

We are proud of our Australian heritage and have been at the heart of the packaging industry for nearly four decades. We believe that an essential ingredient to our success is our ability to respond quickly to our customers' needs and create true value for them.

Supported by our state of the art manufacturing technologies and product innovations, we offer a comprehensive range of solutions that focus on current lifestyle trends and enhance the quality and freshness for your products everyday.

We have a dedicated, in-house team of customer service, sales executives and technical experts who work closely together to not only deliver a personalised, efficient service, but also to create a solution that meets your business specific needs.

“We are proud of our Australian heritage and have been at the heart of the packaging industry for nearly four decades.”

About us.

A customer-driven approach to the food service industry

With most of our products being manufactured in Australia in HACCP certified facilities, and distribution centres located throughout the East and West coasts, and New Zealand, we have the ability to react quickly to today's fast changing markets, and ensure ongoing deliveries.

OUR VISION

To become well known as Australia's trusted packaging partner, delivering added-value packaging solutions to the food-service industry while keeping a strong focus on innovation, flexibility, responsiveness and sustainability.

OUR MISSION

To provide the food-service industry with a comprehensive range of innovative, efficient and sustainable food and beverage packaging solutions, that will protect your product and your business.

2000+ products in our range

42% of our products are made in MPM-owned facilities

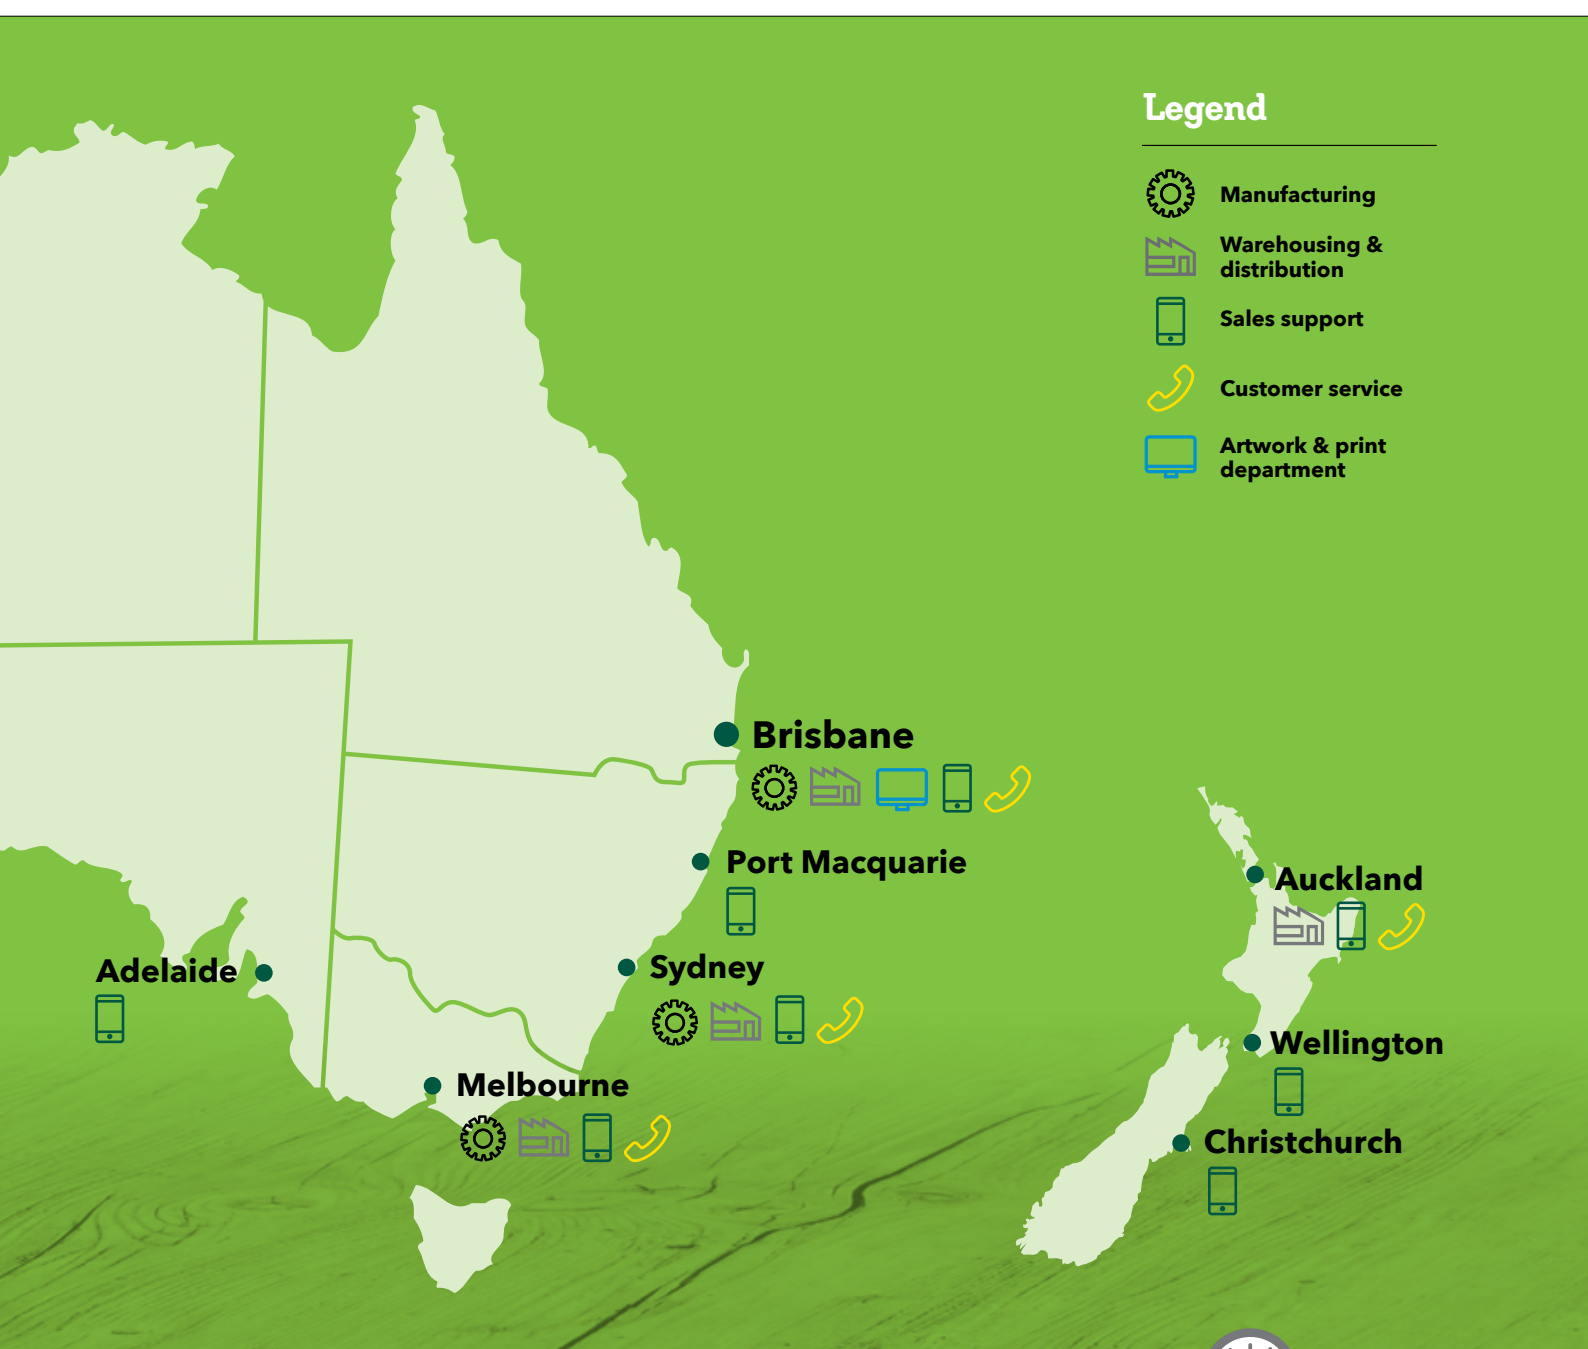

65% of our products are Australian made

Our values.

Our values appear in everyday working life and guide our strategic direction and corporate planning.

SERVICE EXCELLENCE

We have an attentive team of sales representatives and product experts, that look after you right from the day you make an inquiry until your requested products are shipped to your locations. Our dedicated, trained and friendly customer service team on the phones are always ready to help with inquiries.

INNOVATION & DESIGN

Being a strategic packaging partner for the food service industry, MPM Marketing Services is uniquely positioned to provide product development, integrating design and artwork, manufacture and technical expertise to get your products on the market faster and drive growth.

SUSTAINABILITY

We are committed to sourcing the most sustainable products and ensuring environmental sustainability plays a part in what we do. MPM Marketing Services is responsible for procuring sustainable, ethical and responsibly sourced materials, goods and services.

TOTAL PACKAGING SOLUTIONS

We stock a varied and versatile range of products, to create a one-stop-shop opportunity for our customers. Whether you are looking to deliver a higher quality food experience, or simply a fast takeaway meal, consumers appreciate the quality and functionality of Castaway® food packaging products.

CONTINUITY OF SUPPLY

We have a national footprint of MPM-owned distribution centres. We hold a full range of stock in each distribution centre to ensure that supply is always local, providing fast and reliable distribution throughout Australia.

**Certificates for our factories are available
at mpmmarketing.com.au**

Sustainability.

We create solutions that make our daily lives more convenient. Our philosophy and long-term commitment to sustainability centres on five key principles:

Innovation

Promote a culture of innovation in order to continuously improve the functionality, environmental sustainability and efficiency of all our products.

Product life cycles

Design and develop products that are both sustainable and commercially viable throughout their life cycle, with a focus on products that are recyclable, compostable, and/or made from renewable materials.

Efficiency & investment

To enhance operational, energy, and material efficiency during manufacture, and throughout the supply chain, through direct investment to improve environmental performance.

Provide options

Offer the customer product options so they can identify which best fits their sustainability goals, financial considerations, and functional constraints.

Consumer education

Reach consumers at every possible touch-point to inform and educate them about packaging materials, environmental concerns, and the correct use and disposal of all our products.

Australian Packaging Covenant

MPM Marketing Services is a signatory to the Australian Packaging Covenant and is an active member of the Australian Packaging Covenant Organisation. Part of our commitment to the covenant involves:

- Submission of our Annual Report and Action Plan for packaging sustainability
- Measuring, tracking and improving performance for packaging sustainability
- Adoption of Sustainable Packaging Guidelines (SPG) into our product design and development process
- Implementation of the Australasian Recycling Label program
- Collaboration with industry through participation in working groups and sustainability projects

Build your brand with us.

At Castaway®, we have the ability to create custom designed and custom printed products over a wide range of substrates. We not only understand structural and graphic design itself, but also the wider context of print, materials, manufacturing techniques and practical implementations. We can manage the entire production process from start-to-finish, offering on-going advice and support.

**Let's get clear, before we get creative.
We'll follow this 5 step process.**

- 1) Choose which products to print
- 2) Test our products in your business
- 3) Agree on logos and colours
- 4) Develop artwork for your approval
- 5) Produce, deliver and/or warehouse

Untap your brand's potential.

Castaway® food packaging products are based on current on-the-go lifestyles trends and offer great on-shelf appeal. Providing innovative packaging solutions is only one part of what sets us apart. A recognised benefit of working with us is our ability to create custom branded and custom printed products, to the full suite of branded packaging to suit your brand personality or business identity.

Get in touch and find out how we can bring your ideas to life!

Marketing.

Promotional material

Designed to provide you with a point of difference, our partner program utilises a variety of promotional tools. Our high quality product catalogues, eye-catching prints, relevant sales and marketing collaterals are the perfect way to communicate the benefits of Castaway® food packaging and leave a lasting impression on your customers. Below is a selection of tools made available to our partners and customers.

Marketing sales material

A wide range of promotional material is available to help you communicate the benefits of choosing Castaway® products. This provides us an excellent opportunity to co-brand and develop customised sales collaterals tailored to your business and target audience.

Point of sale promotions

Our informative counter cards, table talkers and posters enable you to effectively communicate your corporate values and green efforts to customers.

Markets we serve.

As a key packaging partner across Australia and New Zealand, we deliver a complete range of packaging solutions that meet different criteria. We service a diverse range of markets and applications – from food service, to street food and meal delivery services, to hospitality, to retail and health-care sector.

Café and coffee

We provide coffee roasters and cafes with a 'one-stop-shop' for packaging solutions. Launched in 2017, our coffee bags complement an existing range of paper cups, napkins, wipes, knock tube bags and containers.

Street food and meal delivery

Designed to perform well with both hot and cold products, our range of takeaway trays, clams and cutlery has evolved to cater for the growing street food business and home delivery market.

Venues and catering

Transporting the food to your venue is as important as ensuring that the food is served in the best way possible. Our extensive range of packaging solutions gives catering professionals the ability to deliver a unique and personalised experience.

Quick service and takeaway

We partner with our customers to help them meet the constantly changing challenges of the quick service restaurant industry while ensuring food safety, brand consistency, and revenue growth.

Hotels/motels, bars and clubs

All our products highlight our ongoing efforts to bring you a comprehensive range of competitively priced packaging products, from food and beverage disposables, to tabletop supplies, to washroom amenities.

Supermarkets and food processors

Our long-term relationship with them has been developed through competitive pricing strategies, product quality, and reliability in meeting schedules for both small and large orders. Our ongoing development aims to minimise waste, enabling maximum resource recovery.

Hospitals

Castaway® packaging range covers every area of a healthcare facility from in-house catering facilities to medical examinations.

Caterer's foil.

High quality foil ideal for cooking, baking, barbequing and grilling.

ALL PURPOSE

For general use in kitchens and takeaway outlets for all purpose wrapping and lining applications.

HEAVY DUTY

Provides a stronger grade of foil for commercial applications – wrapping bulky goods, heating in bain-maries and cooking in ovens.

EXTRA HEAVY DUTY

The thickest grade of foil, ideal for covering large baking dishes, wrapping meats on the bone, and freezing for long term storage.

RECIPE // Grilled salmon foil packs

Ingredients

- 1 ½ lb salmon fillets, skin removed, cut into 4 serving pieces
- 2 tablespoons vegetable oil
- ½ teaspoon salt
- ½ teaspoon pepper
- 1 medium lemon, sliced
- 2 tablespoons finely chopped fresh parsley

Cooking

Heat gas or charcoal grill. Take 4 sheets of medium size Easy-Pick heavy duty foil. Place salmon piece on center of each sheet. Brush ½ tablespoon oil over both sides of each salmon piece. Sprinkle salmon pieces with salt and pepper to taste. Place about 3 lemon slices flat or overlapping on each piece.

Bring up 2 sides of foil over salmon so edges meet. Seal edges, making tight ½-inch fold; fold again, allowing space for heat circulation and expansion. Fold other sides to seal. Place packets on grill over medium-low heat. Cover grill; cook 13 to 16 minutes, rotating packets ½ turn after about 7 minutes, until salmon flakes easily with fork.

To serve

Cut large X across top of each packet; carefully fold back foil to allow steam to escape. Sprinkle with parsley or rosemary. Serves 4.

Baking & cooking paper.

Food service

Easy-Bake® is a specially designed non-stick baking and cooking paper for use in both the home and commercial kitchens. The non-stick coating prevents the need to cook or bake with oils or grease, providing a healthier and easier way to cook food.

Line baking trays
or cake tins

RECIPE // Grilled Rosemary Chicken Salad

Ingredients

For the chicken

2 small free range organic chicken breasts
2 tablespoons hot sauce
Salt and black pepper

For salad

5 cups lettuce — chopped
1 cup cucumber — sliced
½ avocado — sliced
½ cup red onions — sliced

For salad dressing

1 tablespoon freshly squeezed lemon juice
2 tablespoons extra virgin olive oil
A pinch of red crushed pepper
Salt & ground black pepper to taste

Cooking

Season chicken with hot sauce, salt and pepper. Place chicken on a greased grill or grill pan and cook for about 3-4 minutes on each side, or until the chicken is cooked through. Leave the breast chicken to cool down, slice it and set aside.

In a large salad bowl, add first the lettuce, and then top it with cucumber, red onions and avocado. In a mason jar, pour the freshly squeezed lemon juice and olive oil. Add salt and pepper and red crushed pepper. Whisk everything together. Continue to whisk while streaming in the olive oil. Taste to check the seasoning and pour over the salad. Add the sliced breast chicken.

To serve

Place the warm chicken breasts right on top of your mixed greens in the containers. Drizzle some lemon dressing over the salad then sprinkle with salt and pepper. Serves 2.

Food Containers.

BettaSeal® Food Containers are designed for superior presentation and extended shelf life for food. The hinged lid design is easy to use and the BettaSeal® closure locks in freshness.

Applications: Salads, fresh foods, biscuits, cakes and desserts.

Meat Trays.

Made from recycled PET bottles, Aqua Cell® meat trays are 100% recyclable. So they can be recycled time and again, contributing to a circular economy for meat tray packaging. The Aqua Cells in the tray are specifically designed to capture and retain fluid, keeping meat products attractive on the shelf, and preventing the fluid from pooling or leaking out of the tray.

Applications: Most cuts of fresh or processed meats including beef, kangaroo, lamb & pork, seafood, poultry and fresh produce.

100%
Recyclable

Ultra clear for
optimum shelf

Folding Food Trays.

Folding food trays are flat-packed for easy storage and can be assembled during staff downtime. They offer a cost-effective alternative to ready-made trays and feature double-sided poly lining to resist liquid and grease. Use our standard sizes for regular takeaway meals, or the longer seafood trays designed to hold fish fillets.

Applications: Fish & chips, bakery products, churros and sweets.

RECIPE // Teriyaki Prawn and Soba Noodle Stir Fry

Ingredients

180 g Soba noodles, dry
 1 tbs olive oil
 500 g green prawns, (24), peeled
 1 large Capsicum, red, raw, thinly sliced
 300 g snow peas
 150 g fresh mushrooms, mixed Asian-style, thinly sliced
 2 clove(s) fresh garlic, thinly sliced
 1/3 cup(s) fresh ginger, (3cm-piece) cut into matchsticks
 2 tbs soy sauce, reduced-salt
 1 tbs honey

Cooking

Prepare noodles following packet instructions or until just tender. Drain. Refresh under cold water and drain.
 Heat a wok over high heat. Add half the oil and heat for 20 seconds. Stir-fry prawns, fry for 2–3 minutes or until just cooked through. Transfer to a plate.

Reheat same wok over high heat. Add remaining oil and heat for 20 seconds. Stir-fry capsicum, snow peas, mushrooms, garlic and ginger for 2–3 minutes or until tender.
 Add prawns, soy sauce, honey and noodles and stir-fry for 1 minute or until heated through. Enjoy!

To serve

Serve the delicious prawns on the bed of stir fried noodles and vegetables. Sprinkle with coriander. Serves 4.

Food Containers.

Colpac® food packs have a natural appearance, and feature clear windows to entice customers to try your creations. They are ideal for cafés and convenience stores wanting an easy grab 'n' go solution for their takeaway food menu.

Which container do I need?

The Castaway® range of foil containers is second-to-none. With high quality manufacturing, and an extensive range of sizes available, there is a solution for any application.

Rolled edge

The rolled edge provides additional strength and safety to the container with no sharp edges.

Hemmed edge

The hemmed edge is where the lip of the container folds out back onto itself to help protect the user from sharp edges.

Perforated (PF)

Perforated containers allow the contents to breathe at warm or hot temperatures.

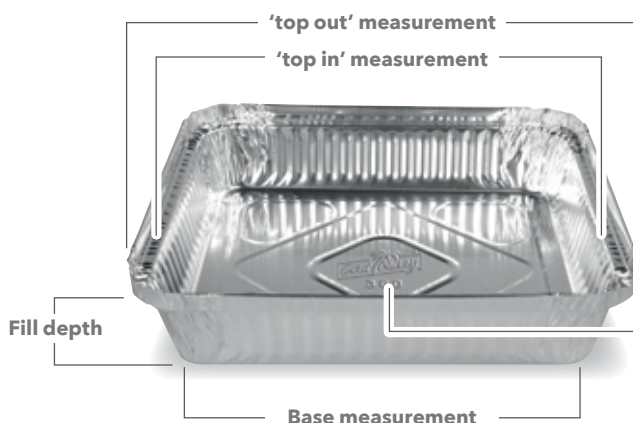

Vertical flange & interrupted curl

The vertical flange provides straight, strong edges that make the container suitable for use with a lid. The interrupted curl allows the corners of the container to be folded securely, locking the lid in place.

Guide to measurements

Branded and coded on the base for easy re-ordering.

Australian Made

Castaway cups are manufactured in our own facilities right here in Australia. By investing in local manufacturing, we not only support our local economy, but also reduce our environmental footprint by reducing transportation to a local-level. All of our facilities are HACCP certified ensuring strict control of food safety and product quality.

Recyclable

Castaway cups are accepted for recycling by many councils throughout Australia. Made from PE-lined liquid paper board, a material that is easier to recycle than milk cartons, they provide a valuable resource that can be reused, reducing the amount of waste sent to landfill.

Sustainably Sourced Paper

Castaway cups are made with paper sourced from certified managed plantation forests. Paper is both renewable and recyclable, contributing to a circular economy where materials can be reused to produce new products.

Water Based Inks

We only use water-based inks for printing Castaway cups, which are free from harmful toxic chemicals, and are made from naturally occurring substances.

local.

Eco-Smart® Lids

Castaway Eco-Smart lids are designed to be recyclable, but if not recycled, they can biodegrade in an anaerobic (nil oxygen) landfill. Using Eco-Smart biodegrading technology, the lid attracts microbes to digest the plastic and turns it into natural soil. Ongoing tests show that Eco-Smart lids biodegrade in an anaerobic landfill environment by 32.7% over 2.53 years using the ASTM D5511 testing standard.

32.7%

2.53 YRS

Brandbuilders® Custom Printing

Custom printed coffee cups are an effective way to promote your business and stand out from the crowd - transform your coffee cups into miniature billboards! Our Design Team can advise you on the best printing options to suit your design requirement and help take your brand further.

Our entire range of coffee cups can be custom printed with your brand or imagery. You can start with a minimum order quantity of 24,000 coffee cups for a short digital print that will get you in the hands of your customers in 6 weeks only.

We do custom printing on Single Wall, Dimple® and Double Wall cups, sizes from 4oz to 16oz. Our Dimple® cups are perfect for coffee shops looking for something a little bit different.

Watch our cups being printed
www.youtube.com/mpmmarketing

How to build your brand in 5 easy steps

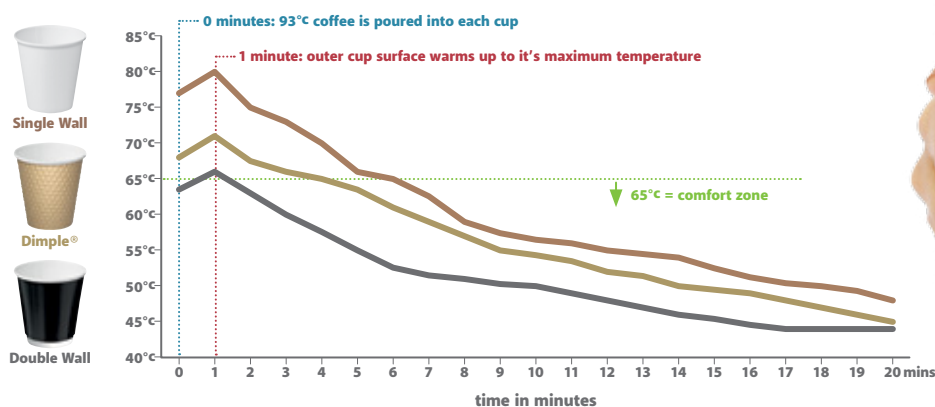

- 1) Choose what cups or products to print
- 2) Test our products in your business
- 3) Agree on logos and colours
- 4) Develop artwork for your approval
- 5) Produce, deliver and/or warehouse

Which cup do I need?

Castaway® Coffee Cups are designed to keep your drinks hotter for longer – allowing customers to enjoy every sip without the compromise of taste and temperature. With its single or double layers of insulation, our cups have an extremely high rate of heat protection adding extra comfort for your customers.

To test the insulation properties of each cup, we poured black coffee equivalent into each cup type. (This is an extreme test starting at a higher than average temperature of 93° C).

The temperature at the outer surface of the cup is measured every minute. This is the 'holding temperature', the heat that your hand feels when holding your coffee. A comfortable holding temperature is 65° C. This graph shows the difference in holding temperature for each cup type over time.

Combo cup lids

Our Eco-Smart® paper coffee cup lids have been designed with a secure SnapOn® fit around the cup for a safe and leak-free experience. The ergonomic design of the sipper has been created to provide a comfortable drinking position without the intrusiveness of a traditional spout.

Castaway® hot cup lids feature Eco-Smart® biodegrading* technology which allows standard plastics to break down into natural soil.

BrandBuilders® custom embossing available

Classic cup lids

Snap-On® paper coffee cup lids are designed to fit Castaway® Classic Single Wall Cups for baristas who prefer the two-lid system for easy cup size differentiation.

Made from recyclable polystyrene (PS)

Secure Snap-On lid fit

Provides safe transportation of hot drinks

Compare features and benefits

There are many things to consider when choosing which type of coffee cup to serve your brew in such as:

- Serving temperatures
- Insulating properties
- Surface texture and feel
- Custom-printing options
- Which size you want to offer.

To help point you in the right direction, we have explained the key differences between our cup ranges in the table below.

	COMBO Double Wall	COMBO Single Wall	CLASSIC Single Wall	DIMPLE® Textured
Description	Double Wall Insulcups® feature an insulating air pocket between two layers, keeping drinks hot while minimising heat transfer to your hand.	Less paper is used in the manufacture of Single Wall paper coffee cups, offering a cost effective alternative for lattes and cappuccinos.	Classic Single Wall cups cater to baristas who prefer the two lid system for easy cup size differentiation.	The unique texture of the Dimple® design offers a point of difference from your competitors, and provides excellent feel and handling.
Wall type	Double wall with insulating air pocket	Single rigid wall	Single rigid wall	Textured outer wall with insulating air pockets
Outer finish	Smooth gloss surface	Matte, uncoated surface	Matte, uncoated surface	Unique, dimple textured surface
Printing	Printable in multiple finishes	Printable to base of the cup	Printable to base of the cup	Printable to base of the cup
Nominal vol [Brim fill vol]	8oz (280 ml) [300 ml] 12oz (355 ml) [390 ml] 16oz (460 ml) [495 ml]	4oz (118 ml) [118 ml] 8oz (280 ml) [300 ml] 12oz (355 ml) [390 ml] 16oz (460 ml) [495 ml]	6oz (190 ml) [225 ml] 8oz (280 ml) [275 ml] 12oz (355 ml) [425 ml] 16oz (460 ml) [510 ml]	8oz (280 ml) [300 ml] 12oz (355 ml) [390 ml] 16oz (460 ml) [495 ml]

*Eco-Smart® polystyrene lids, plates, bowls and cutlery have been shown to biodegrade 32.7% after 2.53 years, under conditions that simulate a wetter biologically active landfill, using the ASTM D5511 standard test. Note that a stated rate of degradation does not mean the product will continue to decompose. Testing continues on all Eco-Smart® products to track the rate of biodegradation. All data will be made available on our website: www.castawayfoodpackaging.com.au

Paper Cold Cups.

Serve your fruit juices, milkshakes, slushies, and smoothies in style with Castaway® paper cold cups. Available in a range of sizes and two eye catching designs, we've got cold beverages covered.

Paper Straws.

The plastic straw ban movement has recently taken Australia by storm, with more businesses opting for eco-friendly alternatives to plastic. The Castaway® range of paper straws are one of them. Made from 3-ply premium food grade paper and available in various shapes and colours, these straws are suitable for cold use and are recyclable and compostable – perfect for serving customers that are looking for ‘on-the-go’ drinking convenience!

Which bag do I need?

Paper bags provide cost effective, recyclable solutions for packaging takeaway food items, including both direct food contact and carry bag applications. The extensive Castaway® range includes various sizes and substrates to suit most applications. Use the guide below to determine which bag is best suited to your particular needs.

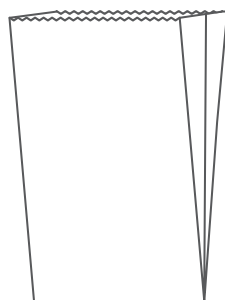

Standard Paper	Glassine Paper	Foil Lined Paper	Greaseproof & Greaseproof Lined Paper	Poly-Coated Paper
Standard paper is uncoated or treated, making it a cost-effective option for packaging food that is pre-wrapped or does not require high liquid or moisture resistance to serve and carry. You can use standard paper bags for serving takeaway pastries, sandwiches, rolls, muffins, cookies and more. You can also use these bags to cover Castaway® RediServe® food trays.	Glassine offers a very smooth, thin paper with a translucent appearance that allows food contents to remain visible. With liquid and moisture resistance, you can use glassine paper bags for chips, pies, hot dogs and various other foods cooked in oil.	Foil lined paper provides excellent resistance to liquids, grease and moisture. The inner foil lining has excellent heat retention properties making it ideal for packaging and serving kebabs, souvlaki, yiros and hot chicken.	Greaseproof paper is impermeable to oil and grease, preventing the paper from becoming soggy or weak. Greaseproof paper is the ideal choice for takeaway food cooked in oil, such as chips, sausage rolls, pies and more. This type of paper also allows the food to breathe, steaming off excess moisture to keep food fresh.	This type of paper is made with a polyethylene (PE) coating to give superior liquid and moisture resistance, resulting in high wet-strength properties. This makes it an ideal alternative to foil lined paper and provides a more natural appearance.

Bottle & Ice Bags.

Castaway® bottle bags are available in a range of sizes to suit various bottle shapes and quantities. The double bottle and triple bottle bags are made with high wet-strength paper to resist condensation and ensure that the bottles can be carried safely and securely. High density ice bags make it easy to portion and package ice for 'grab and go' convenience.

Vacuum Bags.

Vacuum packaging is ideal for foodservice or retail operations where food preservation and portioning is fundamental. Vacuum sealing extends shelf life, preserving the produce and allowing the flavours to penetrate the food. The strength and barrier qualities of the vacuum bags allow foods to be presented on shelf in stores or restaurants, making them convenient meal solutions for customers.

Applications: Meats, poultry, fish, fruit, vegetables, dried fruits and nuts.

Which glove do I need?

With five main glove types available, each with their own unique qualities, it is important to understand the strengths and weaknesses of each. The guide below will help you to choose the right glove for your needs.

Compare features and benefits

Quick Service	Vinyl	Stretchies®	Nitrile	Latex
Embossed polyethylene, seam-moulded	Synthetic vinyl, one-piece mould	Stretchable elastic, seam-moulded	Synthetic rubber; high puncture resistance	Natural, biodegradable rubber; high puncture resistance
Loose cuff	Beaded cuff	Loose cuff	Beaded cuff	Beaded cuff
Looser fit than other types	Looser fit than nitrile and latex; tighter than quick service; lower tactile sensitivity	Looser fit than nitrile and latex; tighter than quick service; lower tactile sensitivity	Moulds around your hand for a tight fit	Best fitting type; highest level of touch and tactile sensitivity
Suitable for short-term use	Suitable for short-term use	Suitable for short-term use	Suitable for extended use	Suitable for extended use
Economical option compared to other types	Economical option compared to nitrile and latex	Double the pack size of vinyl	More expensive than vinyl and Stretchies®	More expensive than vinyl and nitrile
Latex-free; powder-free	Latex-free; available in powdered or powder-free	Latex-free; powder-free	Latex-free; powder-free	May cause allergic reactions; powdered
Applications: Food preparation, counter tasks	Applications: General, food preparation, cooking, counter tasks, dishwashing, janitorial	Applications: General, food preparation, cooking, counter tasks, dishwashing, janitorial	Applications: General, food preparation, cooking, counter tasks, dishwashing, janitorial, exam	Applications: General, food preparation, cooking, counter tasks, dishwashing, janitorial, exam

Powdered vs. Powder-free

Some gloves are lightly powdered to make them easier to put on and take off, however, this can be the cause of allergies due to the powder content. There is also a risk of the powder falling off into food or making a mess in your work environment. These are the main reasons many businesses choose powder-free gloves as they reduce the risk of allergic reactions and are suited to foodservice environments where food must be protected.

Vinyl Gloves.

PrimeSource® vinyl gloves are ideal for a range of applications including food preparation, light-duty cleaning and general maintenance. These gloves are 100% latex free, and have a comfortable stretch fit with high tensile strength.

Smooth grip surface

Ambidextrous shape

Latex free

Beaded cuff style

Powdered Vinyl Gloves

Which garbage bag do I need?

With so many options available, it can be difficult to select the correct garbage bag or bin liner for your particular needs. Are you disposing of paper in the office, or glass bottles and wet food at your pub or restaurant? Choosing the correct bag is critical to prevent accidental spills and protect the safety of you and your colleagues. Use the guide below to find the correct garbage bag for your particular application.

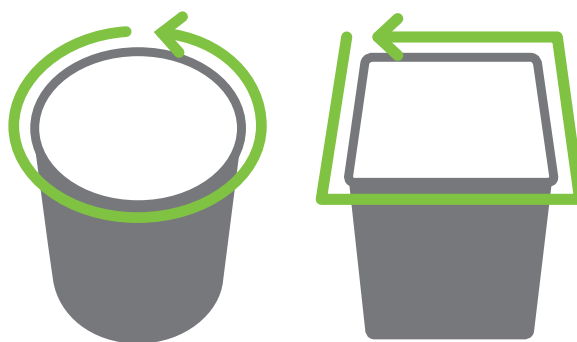

Sizes

There are so many different bin sizes that it can be difficult to find the correct fit. You can use the method below to estimate the size of garbage bag or liner you need, by determining width and length measurements.

Calculate bag width: Measure the circumference of the bin and divide it by half.

Calculate bag length: Measure the height of the bin, then add approximately 100-150 mm for an overhang. This will help prevent the bag from falling inside the bin, and allow you to tie the bag afterwards when it is full.

Measuring circumference

Types

EXTRA HEAVY DUTY

Extra heavy duty bags are highly resistant to punctures and tears, and have superior stretch and strength attributes. They are ideal for heavy items such as wet food waste and glass bottles, or for environments where infrequent changes are required.

HEAVY DUTY

Heavy duty bags have excellent stretch capability making them easy to fit, as well as lift out of the garbage bin when full. They resist punctures and tears and are the best all-round option for situations where different types of waste are placed in the one bin.

PREMIUM / KITCHEN

Premium liners and kitchen tidy bags are made from higher density materials which gives them more rigidity, and less stretch and weight. They offer a cost-effective solution for environments where frequent changes are required, and are ideal for offices and restrooms where only light refuse is disposed of.

Seals

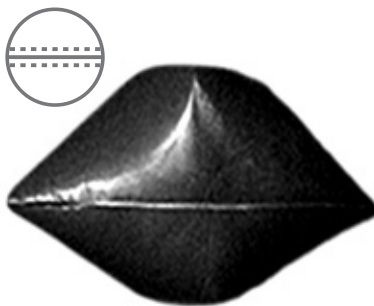

Star seal

Star seal bags have greater vertical strength because the underside of the bag is gathered, folded and sealed at the centre of the base of the bag.

Choose a star seal bag for:

- Preventing leaks – sealed at the centre, the bag is less likely to leak through a seam
- Heavy duty applications – the bag will hold more weight without breaking
- Easy removal – the star seal gives the bag a more rounded shape when full, making it easier to remove from the garbage bin

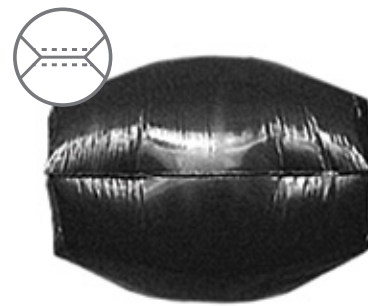

Flat seal

A flat seal is where the seal has been applied to run from one side to the other side of the bag. The flat design of the bags mean that they do not fit as well to the shape of most garbage bins.

Choose a flat seal bag for:

- Reducing costs – flat seal bags maximise volume capacity
- Light duty applications – flat seals are not as strong as star seals or gusseted seals

Gusset seal

A gusset seal bag is similar to a flat seal but with both sides tucked in to make a gusset.

Choose a gusset seal bag for:

- Maximising volume capacity – the extra width provided by the gusset allows more garbage to fit in the bag
- Wheelie bins – the gusset seal gives the bag a more rectangular or square shape, making it a good fit for wheelie bins

Guide to Plastics.

Plastic identification symbols

To help consumers identify plastics when sorting them for recycling, the plastics industry started a program of coding plastic packaging with a recycling symbol either on the top, or the bottom of the package. The numbers are not in any particular order, therefore, one number is not more recyclable than the other according to its number. The code indicates which type of plastic resin was used to make that particular product. Check with your local council to determine if recycling is available for the plastic packaging you use.

Polyethylene Terephthalate (PET or PETE)

Polyethylene terephthalate is a condensation polymer that is widely used as a packaging material due to its toughness and clarity. It is widely used for the production of bottles for soft drinks and carbonated beverages, and is the most widely recycled type of plastic in Australia.

Benefits

- Toughness
- Shatterproof
- Lightweight
- Recyclable*
- Good barrier properties
- Clarity

High Density Polyethylene (HDPE)

Low Density Polyethylene (LDPE)

Polyethylene is produced in two forms: high density and low density. As the density increases, so does the stiffness, hardness, and strength of the material.

As the density decreases, impact strength and crack resistance increase.

Benefits

- Odourless and tasteless
- Excellent chemical resistance
- Very tough at low temperatures
- Low in water vapour transmission (won't easily sweat or fog)
- High permeability to air and gases
- Recyclable*

Polyvinyl Chloride (PVC)

Polyvinyl chloride is strong and has excellent water and chemical resistance properties. PVC exhibits good weather resistance and abrasion resistance.

Benefits

- Ideal as a food packaging material
- Good clarity
- Tough

Polypropylene (PP)

Polypropylene, in its natural state, is a fairly hard and cloudy material. Because of its chemical make-up it cannot be produced as a crystal clear material such as PET. It is one of the lightest plastics available with a range of thicknesses.

Benefits

- Good surface hardness and scratch resistance
- Excellent resistance to water and gas vapour
- Good chemical resistance

Polystyrene (PS) & Expanded Polystyrene (EPS)

Polystyrene is an odourless and tasteless polymer produced from ethylene and benzene. The addition of synthetic rubber, or butadiene, makes it a much tougher and more versatile plastic. Polystyrene can be expanded to form a lightweight foam, making it an outstanding insulation material.

Benefits

- Good surface hardness and scratch resistance
- Excellent resistance to water and gas vapour
- Good chemical resistance

Other

Includes all other resins and multi-materials such as laminates. Acrylonitrile butadiene styrene (ABS), acrylic, nylon, polyurethane (PU), polycarbonates (PC) and phenolics.

*Where suitable recycling facilities are available. Contact your local council for further information.

Please note: The information provided on the plastics above is general in nature, and is believed to be accurate and reliable, but no warranty, express or implied is given.

eco-smart® Biodegradable*

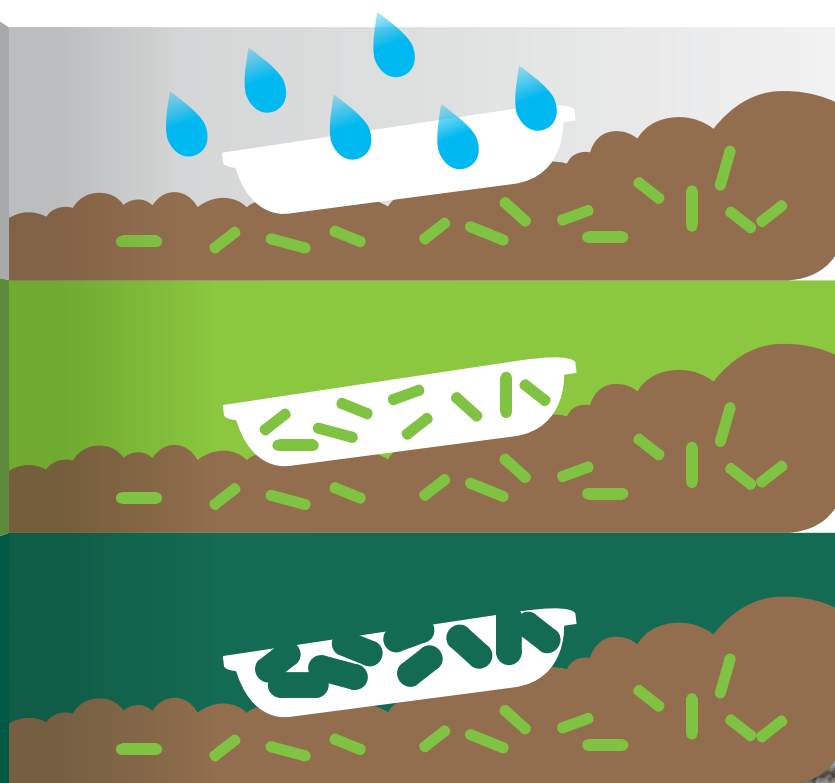

Increasingly, more of our plastic products are becoming biodegradable* through using our industry leading Eco-Smart® technology. This innovation allows traditional plastics to biodegrade through a series of chemical and biological processes, when introduced to a microbe-rich environment such as a modern landfill. This process unlike other “bio-plastics” does not compromise recyclability.

How it works

Our Eco-Smart® additive allows plastic to biodegrade* through a series of chemical and biological processes, when introduced to a microbe-rich environment such as a biologically active modern landfill.

Eco-Smart® accelerates the biodegradation of treated plastics by attracting microbes – microscopic organisms vital to the earth's ecosystem.

These microbes colonise on the surface of the plastic where they secrete acids that break down the polymer chain, allowing them to utilise the carbon backbone of the chain as an energy source.

Frequently asked questions

Are products made with Eco-Smart® certified recyclable?

Currently there are no recognised standard certifications for recyclability. A number of independent laboratories have been provided with samples of plastic made with Eco-Smart®. The tests indicated that Eco-Smart® does not affect the recyclability of plastics.

What prevents plastics made with Eco-Smart® from degrading in inventory or on the shelf?

Eco-Smart® treated products must be disposed of or kept in active microbial environments, such as a managed landfill, in order to biodegrade.* Warehouse and retail environments

do not contain the microbes needed for biodegradation, so plastics treated with Eco-Smart® have an unlimited shelf life and are completely non-toxic.

What is the manufacturing process for using additives?

Using the additive in the manufacturing process is easy to do and usually does not require any equipment modification. Eco-Smart® is added via a standard commercial gravimetric hopper, just as you would add a colorant into the extruder feed-throat. Eco-Smart® is usually loaded at 0.7–4% by weight.

Plastic.

Does Eco-Smart® contain any heavy metals?

Eco-Smart® does not contain any compounds that would be considered heavy metals, light metals or metal ions. Eco-Smart® is a combination of true organic compounds from oil and other nutrients found in the environment.

Does Eco-Smart® change the physical characteristics of plastic?

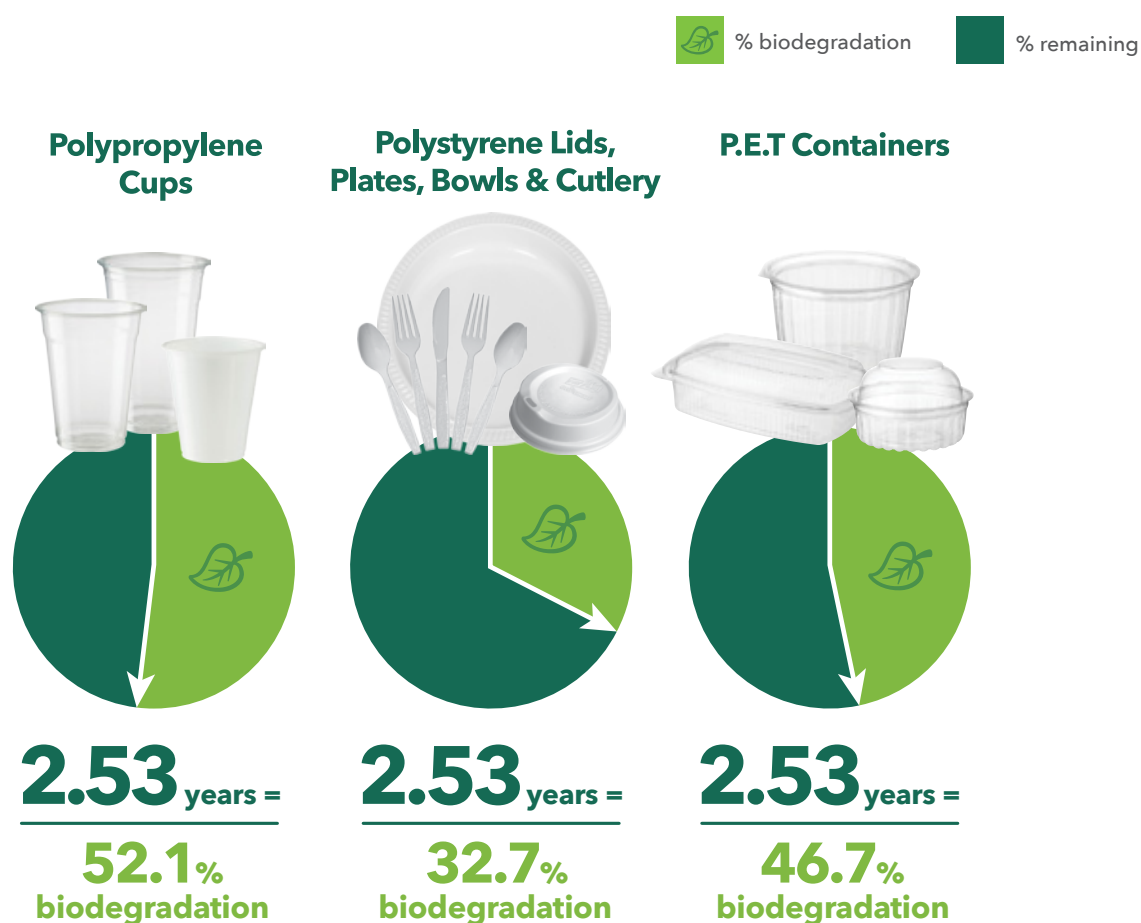

There are no noticeable changes to the physical characteristics of plastic such as tensile strength, glass temperature, melting temperature, transition rates, etc.

Does Eco-Smart® affect the plastic's performance at elevated temperatures?

No. Tensile strength and physical properties are maintained even in elevated temperatures. In temperatures exceeding the normal operating range for a specific resin, Eco-Smart® plastics would experience the same change in properties as the standard untreated plastic.

Ongoing Eco-Smart® testing

The progress charts below show how Eco-Smart® products biodegrade over time. These tests are ongoing and the progress results will be updated as more data becomes available.

*Eco-Smart polypropylene cups have been shown to biodegrade 52.1% after 2.53 years; Eco-Smart polystyrene lids, plates, bowls & cutlery have been shown to biodegrade 32.7% after 2.53 years; Eco-Smart P.E.T containers have been shown to biodegrade 46.7% after 2.53 years, under conditions that simulate a wetter biologically active landfill, using the ASTM D5511 standard test. Note that a stated rate of degradation does not mean the product will continue to decompose. Testing continues on all Eco-Smart products to track the rate of biodegradation. All data will be made available on our website: www.castawayfoodpackaging.com.au
