WELCOME /ABOUT US

INNOVATION, QUALITY & RELIABILITY.

MPM Marketing Services manufacture, market and distribute innovative packaging products for the foodservice industry to cover a wide range of applications, under our iconic brand Castaway®.

We are proud of our Australian heritage and have been at the heart of the packaging industry for four decades. We believe that an essential ingredient to our success is our ability to respond quickly to our customers' needs and create true value for them.

We have a dedicated, in-house team of customer service, sales executives and technical experts who work closely together to not only deliver a personalised, efficient service, but also to create the right solution that meets your business's specific needs.

At Castaway®, we are committed to creating a circular economy for packaging. To do our part to help achieve this, we are constantly developing high-quality, sustainable food packaging.

A CUSTOMER-DRIVEN APPROACH TO THE FOODSERVICE INDUSTRY

With most of our products being manufactured in Australia in HACCP certified facilities, and distribution centres located throughout Australasia, we have the ability to react quickly to today's fast changing markets, and ensure ongoing deliveries

OUR VISION

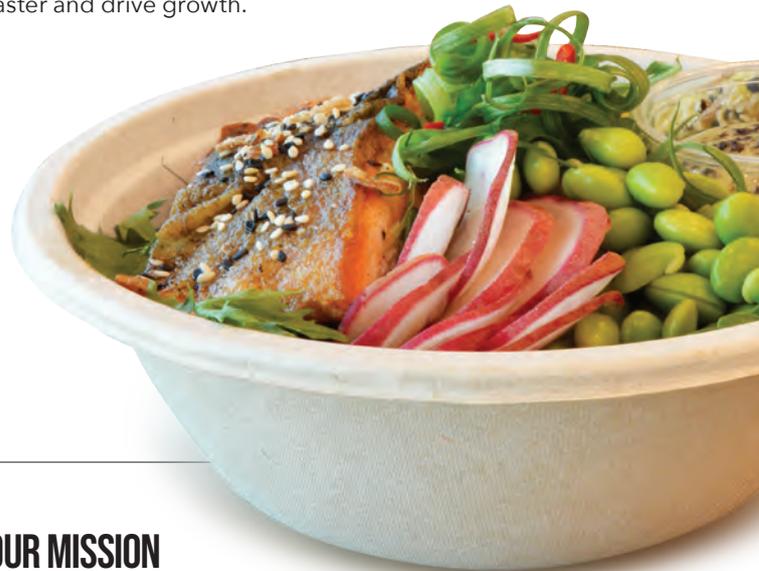

To become well known as Australia's trusted packaging partner, delivering added-value packaging solutions to the food-service industry while keeping a strong focus on innovation, flexibility, responsiveness and sustainability.

CUSTOMER-CENTRIC SERVICE

We have an attentive team of sales representatives and product experts, that look after you right from the day you make an inquiry until your requested products are shipped to your locations. Our dedicated, trained and friendly customer service team on the phones are always ready to help with inquiries.

INNOVATION AND DESIGN

Being a strategic packaging partner for the food service industry, we are uniquely positioned to provide product development, integrating design and artwork, manufacture and technical expertise to get your products on the market faster and drive growth.

OUR MISSION

To provide the foodservice industry with disposable packaging solutions that are innovative, efficient and sustainable while adding value to the customer experience.

WELCOME /ABOUT US

SUSTAINABILITY

We are committed to sourcing the most sustainable products and ensuring environmental sustainability plays a part in what we do. Castaway® is responsible for procuring sustainable, ethical and responsibly sourced materials, goods and services.

CUSTOMER-CENTRIC SERVICE

We have an attentive team of sales representatives and product experts, that look after you right from the day you make an inquiry until your requested products are shipped to your locations. Our dedicated, trained and friendly customer service team on the phones are always ready to help with inquiries.

TOTAL PACKAGING SOLUTIONS

We stock a varied and versatile range of products, to create a one-stop-shop opportunity for our customers. Whether you are looking to deliver a higher quality food experience, or simply a fast takeaway meal, consumers appreciate the quality and functionality of Castaway® Food Packaging products.

CONTINUITY OF SUPPLY

We have a national footprint of Castaway-owned distribution centres. We hold a full range of stock in each distribution centre to ensure that supply is always local, providing fast and reliable distribution throughout Australia.

SUSTAINABILITY PRINCIPLES

We are committed to excellence in all aspects of our business and operate a continual improvement program to assess and reduce all environmental aspects and their impacts. Our philosophy and long-term commitment to sustainability centres on these five key principles:

Innovation

Promote a culture of innovation in order to continuously improve the functionality, environmental sustainability and efficiency of all our products.

Product Life Cycles

Design and develop products that are both sustainable and commercially viable throughout their life cycle, with a focus on products that are recyclable, compostable, and/or made from renewable materials.

Efficiency & Investment

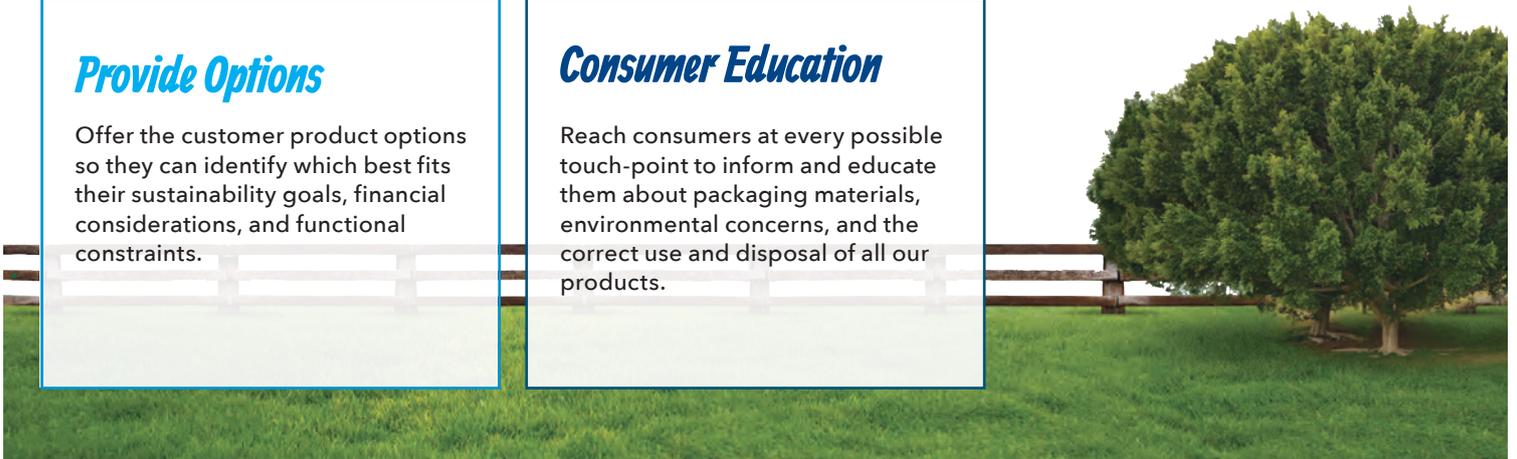

To enhance operational, energy, and material efficiency during manufacture, and throughout the supply chain, through direct investment to improve environmental performance.

Provide Options

Offer the customer product options so they can identify which best fits their sustainability goals, financial considerations, and functional constraints.

Consumer Education

Reach consumers at every possible touch-point to inform and educate them about packaging materials, environmental concerns, and the correct use and disposal of all our products.

WELCOME /ABOUT US

AUSTRALIAN PACKAGING COVENANT

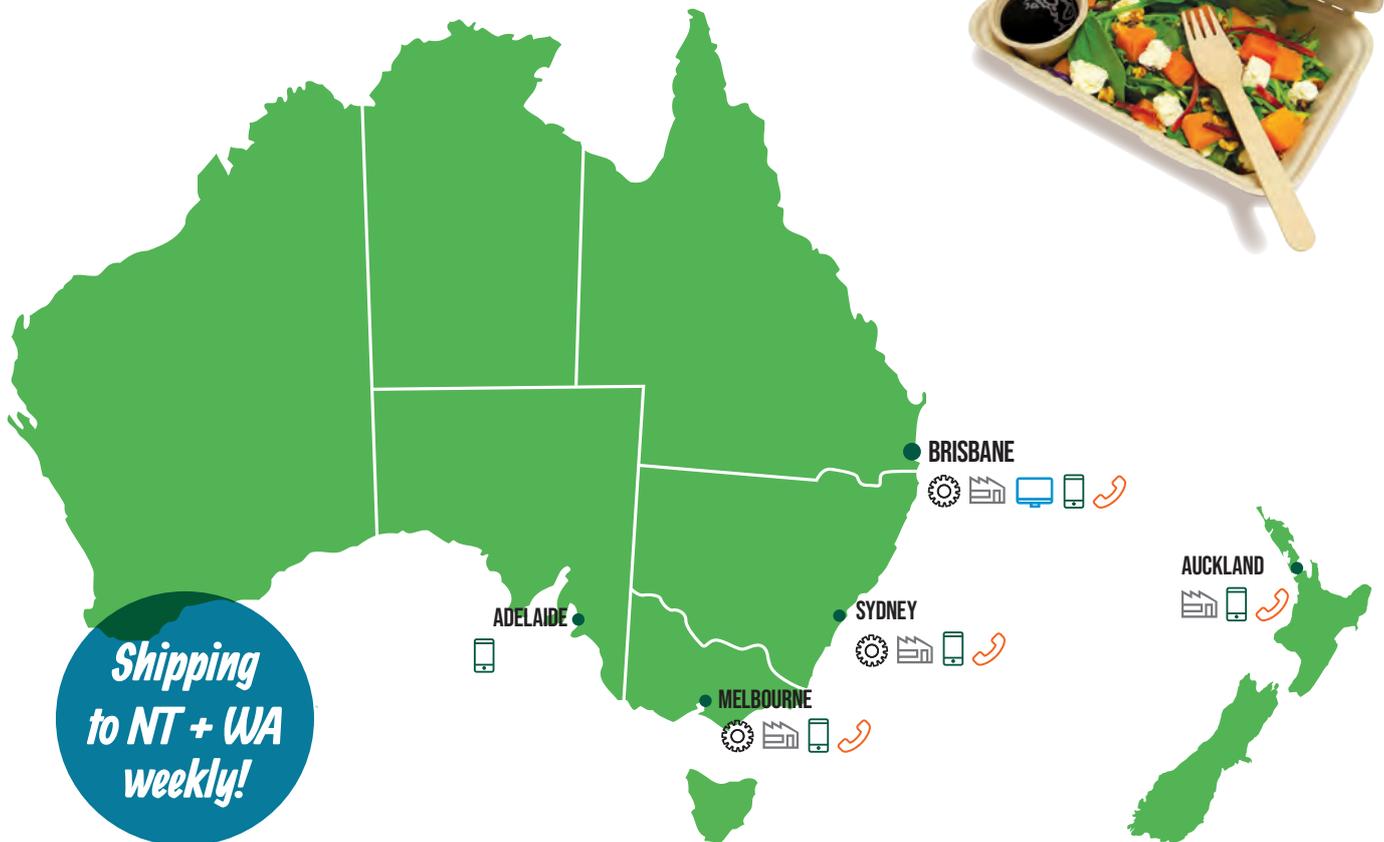

Castaway® is a signatory to the Australian Packaging Covenant and is an active member of the Australian Packaging Covenant Organisation (APCO). Part of our commitment to the covenant involves:

- Submission of our Annual Report and Action Plan for packaging sustainability
- Measuring, tracking and improving performance for packaging sustainability
- Adoption of Sustainable Packaging Guidelines (SPG) into our product design and development process
- Implementation of the Australasian Recycling Label program
- Collaboration with industry through participation in working groups and sustainability projects

WE ARE WHERE YOU NEED US

Our extensive distribution network throughout Australia and New Zealand allows your business to take advantage of the shortest lead times possible. Each warehouse carries our full range of products, so that deliveries are faster, and any product can be ordered locally.

/KEEPING IT LOCAL

WE ARE ON A JOURNEY TO MAKE THE MOST SUSTAINABLE AND ENVIRONMENTALLY CONSCIOUS PRODUCTS ON THE AUSTRALIAN MARKET

AUSTRALIAN MADE

Castaway® cups are manufactured in our own facilities right here in Australia. By investing in local manufacturing, we not only support our local economy, but we also reduce transportation to a local level. All our facilities are HACCP certified ensuring strict control of food safety and product quality.

SUSTAINABLY SOURCED PAPER

Castaway® cups are made with paper sourced from certified managed plantation forests. Paper is both renewable and recyclable, contributing to a circular economy where materials can be reused to produce new products.

WATER BASED INKS

We only use water-based inks for printing Castaway® cups, which are free from harmful toxic chemicals, and are made from naturally occurring substances.

RECYCLABLE

Castaway® cups are accepted for recycling by many councils throughout Australia. Our new Aqueous Cups have a water-based coating and are recyclable where facilities exist.

PRODUCT INNOVATION

We have developed an aqueous coated cup – making it easier to recover valuable resources that might otherwise end up in landfill. Turn to page 12 for more on our aqueous coated paper coffee cups.

B BRANDBUILDERS CUSTOM PRINTING

Our entire range of coffee cups can be custom printed with your brand or imagery. Turn to page 11 to read more about the steps to build your brand.

Fits Classic Cups: 6 & 8oz

Fits Classic Cups: 12 & 16oz

EVERYTHING COFFEE /CUSTOM PRINTING

BUILD YOUR BRAND

CUSTOM PRINTED COFFEE CUPS

Our entire range of coffee cups can be custom printed with your brand or imagery. You can start with a short minimum order quantity of 24,000 coffee cups for a short print that will get you in the hands of your customers in only 6 weeks.

ARTWORK

Our in-house graphic designers can either convert or enter your artwork onto our template for approval. Please ensure that the design is finalised prior to submitting your artwork to us. This means all the elements in your concept such as any text, logos, etc. have all been confirmed. We have an in-house graphic designer who will fit it into our template, however any changes to the design after this has been done may incur extra charges.

DELIVERY

We deliver to locations Australia-wide. The freight cost and delivery time will be determined once you provide us with your delivery postcode.

ENQUIRE NOW!

Contact us today to find out how we can build your brand and your business.

/STAND-UP COFFEE POUCHES

Stand-up pouches feature a wide opening that makes it easy to fill. It is a versatile choice for roasters who pre-fill the pouch with beans, seal with the zipper, and then at the time of purchase, grind them for the customer. The bottom gusset allows the pouch to sit upright and the re-sealable zipper provides added convenience to keep the beans fresh between brews.

/BOX BOTTOM COFFEE BAGS

Box bottom bags retain their shape to sit neatly on the shelf like a box, ensuring strong visual impact and stability. This allows a greater number of facings on a retail shelf and avoids the need to tape the bottom of the bag.

Naturally sustainable.

Our Enviroboard range combines sustainable design with exceptional performance, using pulp that comes from sugar cane fibres (bagasse) – one of the world’s most abundant annually renewable resources. Sugarcane bagasse is the dry residue left after sugar cane fibre has been pressed for juice. Being a renewable material it is low impact, and ideal for producing food packaging due to its high strength.

* CERTIFIED INDUSTRIALLY COMPOSTABLE TO EN13432. CERTIFIED HOME COMPOSTABLE TO OK COMPOST HOME.

SUGARCANE TAKEAWAY CONTAINERS

/ENVIROBOARD® CONTAINERS

Enviroboard Food Containers are the ideal choice for food service operators looking to reduce their environmental impact. Made from renewable sugarcane, these containers are compostable, while their matching secure, rPET lids offer optimum visibility, and are recyclable – making this range the perfect takeaway solution.

KRAFT SANDWICH WEDGES

Castaway® Kraft Sandwich Wedges use a water-based barrier coating unlike conventional plastic lined containers ensuring an easily recyclable paperboard via existing recycling streams. Designed to provide oil and grease resistance along with an anti-fog viewing window, these are an easy grab 'n' go solution for cafes and convenience stores.

DESIGNED WITH CIRCULARITY IN MIND

Increasingly, more of our Castaway® products are made using recycled materials. This innovation allows valuable resources to be reused, recovered and recycled.

THE EVOLVING CONSUMER

Integrating recycled content into packaging makes good commercial and environmental sense. Consumers are more and more concerned about the environmental impact of packaging, and many food service operators and retailers are looking at recycled content in packaging, as part of the solution.

RETHINKING OUR PACKAGING DESIGN

At Castaway® we embrace the circular economy and support

the Australian Packaging Covenant's target: "50% average recycled content" will be included across our packaging by 2025.

Designed with circularity in mind, our EcoSmart® products contain at least 50% recycled content, and are recyclable within our current infrastructure. Truly, the smartest choice for sustainability.

LINEAR VS CIRCULAR

Unlike a traditional linear economy (make, use, dispose), a circular economy extracts the maximum value from materials and products while in use, then recovers and regenerates them. See graphic below.

FAQS

DO ECOSMART® PRODUCTS CONTAIN BPA?

No. Our packaging products are free from BPA and BPS, and phthalates. We have, in fact, never used BPA in any of our products.

WHY DO ECOSMART® PRODUCTS USE RECYCLED CONTENT?

Castaway® is committed towards creating a circular economy – enabling more packaging to either remain in loops, or have the best possible opportunity to be recycled. The growing challenge of plastic in the environment has stressed the urgency to find solutions to reduce, reuse, recycle and recover ‘post-consumer’ plastic waste.

A more circular use of materials means lower costs and less waste. Making products using recycled contents often uses much less energy than producing the same products from raw or virgin materials. It means new sources of value for our customers and consumers, better risk management of raw materials, and improved approaches to the supply chain.

WHAT’S THE DIFFERENCE BETWEEN “RECYCLED” AND “RECYCLABLE”?

Recycled means the container already has contents from previous used material. In other words, recycled content means that the new product you’re using was made (at least in part) from content that has been recycled.

A product labelled as recyclable can go into the recycling bin and be re-processed into new products. EcoSmart® containers are both recycled and recyclable – the best of both worlds.

IS RECYCLING EASY?

Recycling is easy once you know how to. Please empty, and rinse all containers – make sure to remove any residual food or product waste before recycling to prevent cross-contamination. Most local councils have a kerbside collection of recyclables that involve placing your recyclables out on the footpath for collection on a set day – just like general waste collection. Your yellow bin is for items that can be recycled.

WHAT PLASTIC CAN I RECYCLE?

Different types of plastic must generally be kept separate for recycling. The Plastics industry Association has introduced a voluntary system of coding to help recyclers and the public identify the type of plastic. A number in a triangle identifies the plastic. The two types of plastic most commonly recycled are P.E.T., and HDPE (high density polyethylene). Other types of plastic are not generally recycled in Australia.

FOIL TAKEAWAY CONTAINERS

/CONTAINER GUIDE

WHICH CONTAINER DO I NEED?

The Castaway® range of Foil Containers is second-to-none. With high quality manufacturing, and an extensive range of sizes available, there is a solution for any application.

ROLLED EDGE

The rolled edge provides additional strength and safety to the container with no sharp edges.

HEMMED EDGE

The hemmed edge is where the lip of the container folds out back onto itself to help protect the user from sharp edges.

PERFORATED (PF)

Perforated containers allow the contents to breathe at warm or hot temperatures keeping your food crisp when needed.

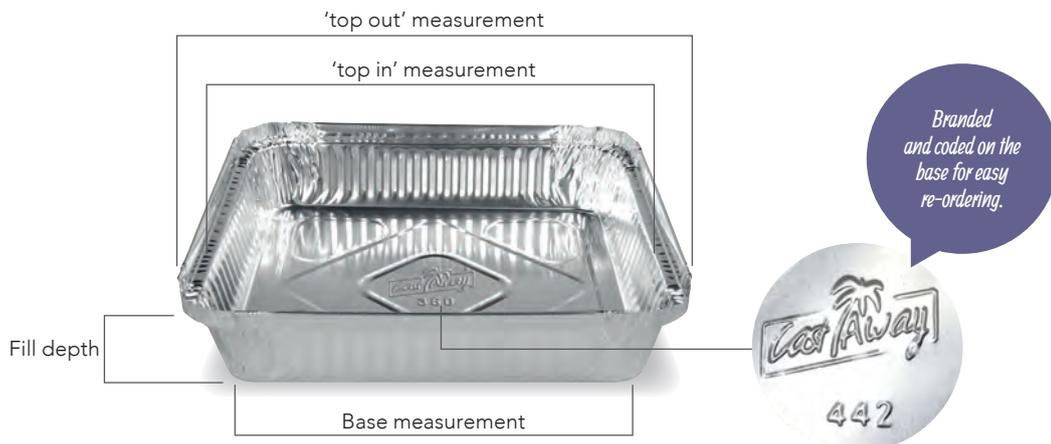

VERTICAL FLANGE

The vertical flange provides straight edges that make the container suitable for use with a lid. The interrupted curl allows the corners of the container to be folded, locking the lid in place.

HELLO
SUMMER!

Show off your drinks with style.

HiKleer R.P.E.T. Cups are crystal clear recyclable P.E.T. for great presentation. And you have peace of mind knowing they are made with at least 50% recycled content and will go back into the recycling stream when recycled after use. With lots of sizes and lid options, your drinks will look great in HiKleer P.E.T. cups. Check out the range on page 71.

BAGS

/PAPER BAGS

Paper bags provide cost effective, recyclable solutions for packaging takeaway food items, including both direct food contact and carry bag applications. The extensive Castaway® range includes various sizes and substrates to suit most applications. Use the guide below to determine which bag is best suited to your particular needs.

STANDARD PAPER

Standard paper is uncoated or treated, making it a cost-effective option for packaging food that is pre-wrapped or does not require high liquid or moisture resistance to serve and carry. Standard paper bags are great for serving takeaway pastries, sandwiches, rolls, muffins, cookies and more. You can also use these bags to cover Castaway® RediServe food trays.

GLASSINE PAPER

Glassine offers a very smooth, thin paper with a translucent appearance that allows food contents to remain visible. With liquid and moisture resistance, you can use glassine paper bags for chips, pies, hot dogs and various other foods cooked in oil.

GREASEPROOF PAPER

Greaseproof paper is impermeable to oil and grease, preventing the paper from becoming soggy or weak. Greaseproof paper is the ideal choice for takeaway food cooked in oil, such as chips, sausage rolls, pies and more. This type of paper also allows the food to breathe, steaming off excess moisture to keep food fresh.

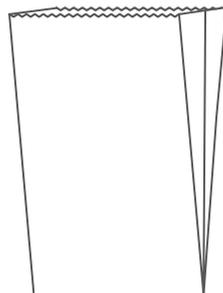

FOIL-LINED PAPER

Foil lined paper provides excellent resistance to liquids, grease and moisture. The inner foil lining has excellent heat retention properties making it ideal for packaging and serving kebabs, souvlaki, yiros and hot chicken.

BAGS

/VACUUM BAGS

Vacuum packaging is ideal for foodservice or retail operations where food preservation and portioning is fundamental. Vacuum sealing extends shelf life, preserving the produce and allowing the flavours to penetrate the food. The strength and barrier qualities of the vacuum bags allow foods to be presented on shelf in stores or restaurants, making them convenient meal solutions for customers. Ideal for meat, poultry, fish, fruits, vegetables, and nuts.

HIGH CLARITY

FULL RANGE OF SIZES TO SUIT ANY PORTION

KITCHEN ESSENTIALS

/SPEED WRAP

Castaway® Speedwrap is ideal for various food wrapping applications where consistent portion control is required. The perforated sheets ensure that portion quantities are even and helps to reduce waste with the same wrap length used each time. Our range of PVC cling film solutions enables superior on-shelf presentation and protection of your meat and produce products. The shelf life of your product is increased through an innovative film structure which controls oxygen transmission.

CATERER'S FOIL

Our high quality, Caterer's Foil is great for general use in kitchens for all purpose wrapping and lining. Heavy Duty provides a stronger grade of foil for commercial applications – wrapping bulky goods, heating in bain-maries and cooking in ovens. Our thickest Extra Heavy Duty foil is best for covering baking dishes, wrapping meats on the bone, and freezing for storage.

CLEANING

/PRIMESOURCE® GARBAGE BAGS

With so many options available, it can be difficult to select the correct garbage bag or bin liner for your particular needs. Are you disposing of paper in the office, or glass bottles and wet food at your pub or restaurant? Choosing the correct bag is critical to prevent accidental spills and protect the safety of you and your customers. Use the guide below to find the correct PrimeSource® garbage bag for your particular application.

COMPARE SIZES AND TYPES

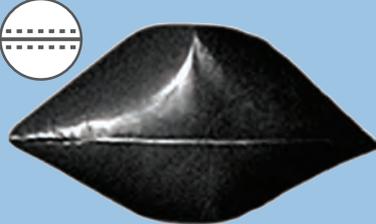

STAR SEAL

Star seal bags have greater vertical strength because the underside of the bag is gathered, folded and sealed at the centre of the base of the bag.

Choose a star seal bag for:

- Preventing leaks - sealed at the centre, the bag is less likely to leak through a seam
- Heavy duty applications - the bag will hold more weight without breaking
- Easy removal - the star seal gives the bag a more rounded shape when full, making it easier to remove from the garbage bin.

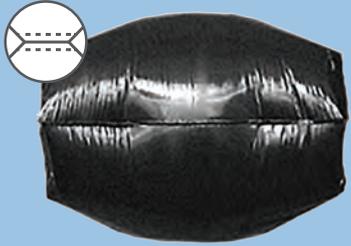

FLAT SEAL

A flat seal is where the seal has been applied to run from one side to the other side of the bag. The flat design of the bags mean that they do not fit as well to the shape of most garbage bins.

Choose a flat seal bag for:

- Reducing costs - flat seal bags maximise volume capacity
- Light duty applications - flat seals are not as strong as star seals or gusseted seals.

GUSSET SEAL

A gusset seal bag is similar to a flat seal but with both sides tucked in to make a gusset.

Choose a gusset seal bag for:

- Maximising volume capacity - the extra width provided by the gusset allows more garbage to fit in the bag
- Wheelie bins - the gusset seal gives the bag a more rectangular or square shape, making it a good fit for wheelie bins.
